COMMODITY INSPECTION EXPERTISE

MATERIALS: Plates, Pipes, Tubing, Flanges, Casing, Castings, Forgings, Pipe Fittings, Forged Fittings, Gaskets & Fasteners etc. GRE, GRP, GRV, HDPE Pipes and Fittings, Strainers, Pipe Hangers & Supports, etc...

STATIC AND MECHANICAL EQUIPMENT'S:

• Pressure Vessel • Boilers • Heat Exchanger Atmospheric Tanks • Line Pipes • Storage Tank
• Surface Condensers • Ball Valves • Gate Valves • Globe Valves • Check Valves • Control Valves
• Butterfly Valves • PSV Valves • Safety Valves • DBB Valves • Plug Valves • Piston Valves • ICS Valves • Needle Valves • Pinch Valves • Reducing Valves • Safety Relief Valves • Diaphragm Valves • Expansion Bellows • Heavy Structural • Absorption Columns • Steam Condensers
• Start Up Blowers • Pipe Heaters • Agitators • Insulation/Refractory Materials • Packing Type Column Internals • Boilers Dearators • Ducts/Dampers • Boiler Components • Fuel Handling Systems • Filtration Packages • Stacks • Air Filters • Water Treatment Packages • Catalyst Columns • Screw Conveyors • VLP Condensate Return Package • Waste Heat Recovery Boilers
• Absorption Refrigeration Package • HP Heaters • Strainers • EOT Cranes • Air-Pre Heaters
• Various Types of Conveyors • Hydraulic Couplings • Weigh Bridges • Vent Scrubbers • Dished Ends • Cooling Tower Package • Piping Power & Process Structural Steel • Cones furnace, Refractories Columns & Stacks • Modules Off Shore platforms & Jackets • Pipeline On Shore

ROTATING EQUIPMENT:

• Centrifugal and Reciprocating Pumps • Compressors • Fans and Blowers • Steam and Hydraulic Turbines • Gearboxes • Engines • Air Motors • Control Valves Actuators • Condensate Extraction Pumps • Sulphur Burner Feed Pumps • Fire Fighting Pumps • Air Compressor Packages • Various Types of Fans / Blowers • Fin Type Air Coolers • Screw Pumps • Booster Pumps • Diesel Engine Driven Pumps • Acid Circulation Pumps • Sump Pumps

ELECTRICAL EQUIPMENT, CONTROLS & INSTRUMENTATION

• Motors, Alternators and Generators • Transformers • Rectifiers, Inverters and Converters
• HVDC Systems • Switchgear (High & Low Voltage) • Circuit Breakers • Fuse Gear • Relays
• Isolating Switches • Over Current Protectors • Under & Over Voltage Protectors • Reactors / Earthing • Transmission Cables • Fiber Optic Cables • Busbars • Insulators • Electrical Junction Boxes / Enclosures • Control Panels • Control Centers • Alarm Systems • Meters and Gauges
• Flowmeters • Transducers • Power Cables (HV, MV, LV) • Control Cables • Instrument Cables
• Special Purpose Cables • Optical Fiber Cables • Voltage Regulators • Switches, Contactors, Starters & Servo Systems / Controllers • Pneumatic Pressure Regulator Valves • CCTV, ICCP, PLC, SCADA, ESD • TCP Panel, PCC Panel, MCC Panel • OLTC / RTCC Panel • Junction Box • Glands
• Lighting • Circuit Breakers • Disconnectors / Isolators • Insulators • UPS Batteries • Capacitors
• Motors (HT / LT) • Switchgear Equipments • Cable Tray • Control Valve • Motor Operated Valve
• Level Switch • Pressure Switch • Level Gauge • Pressure Gauge • Temperature Gauge • Siphon Pressure Gauge • Flow Meters • Magnetic Flowmeter • Vortex Flow Meter • Temperature Indicator
• Pressure Indicator • Transmitter • Radar Type Transmitter • Pressure Transmitter • Level Transmitter • Sensor • Thermocouples • Thermowells • Analyzer • Fitting & Tubing

SECOND PARTY INSPECTION:

It is expected that the material and items you have received from sub-vendors/partner companies do not meet your expectations and would cause a delay in production. Many suggest getting ISO 10204 3.2 certified items/materials to avoid this, but assigning an inspector to attend the tests is too expensive and time-consuming. With our well-distributed network of professional inspectors, you have the possibility to perform the inspections on your request with a reasonable price.

If you need additional personnel to carry out system monitoring as second party inspection under your umbrella and following your instructions by your vendors and subcontractors, **TASK** can work as a part of your team on a needs-based basis, offering the flexibility to respond to unexpected spikes in demand or other unusual circumstances. Whether for a one-off project or ongoing project, our engineers can work with you on-site to provide accurate and reliable results wherever and whenever you need us. Most of our expert testing and inspection teams have decades of documented experience in various industries and sectors, including the petrochemical, chemical, oil & gas industries, power plants etc...

EXPEDITING INSPECTION

Expediting is a concept in purchasing and project management for securing the quality and timely delivery of goods and components. **TASK Inspection & Industrial Services Private Limited** provides the qualified & analytics expeditors to India and various countries for completed project successfully within the time frame. The procurement department or an external expeditor controls the progress of manufacturing at the supplier concerning quality, packing, conformity with standards and set timelines. Thus, the expeditor makes sure that the required goods arrive at the appointed date in the agreed quality at the agreed location.

- Supplier/Vendor Procurement Status
- Assessment of Production Schedules
- Monitoring Supplier/Vendor Schedules for Submittal of Documentation
- Verification of Delivery/Completion Schedules
- Manpower Loading and Assessment
- Verification of Production Schedule
- Verification of Equipment Capabilities
- Auditing Supplier/Vendor manufacturing Processes
- Engineering Information Verification
- Reporting Daily/Weekly/Monthly basis

ISO AUDIT AND CONSULTING

We provide System Audits (Quality, Environment, Health and Safety), Product Audits and System Audits at Supplier Premises as per international standard and client requirement.

SHUTDOWN / TURNAROUND / IN-SERVICE INSPECTION / RISK BASED INSPECTION / FITNESS FOR SERVICES:

We specialize in carrying out Shutdown/ turnaround projects and technical staffing services for various Oil and Gas industries based across the India and worldwide.

We have well qualified and adequate resources to fulfil our customer needs and criteria.

INSPECTION OF STATIC EQUIPMENTS:

- During Shutdown various static equipments inspection activities as opened and detailed internal visual inspection, witness and review of NDT and Advance Inspection Techniques, UT thickness witness on selected location (CML), external inspection, weld visual, identification of damages mechanism, visual of CUI, witness of hydro test (shell, tube bundle, steam coil etc..), internal and external painting inspection, witness of repair of welding and painting, clearance for box-up, reports and documents review etc...
- During shutdown, the Pressure Safety Valves (PRV), witnessed of pre-POP test, visual inspection after disassembled and cleaning, Final POP test, Seat tightness test and reports review.

LIST OF STATIC EQUIPMENT INSPECTION:

Pressure Vessels, Column, AGR amine Stripper Re-Boiler, Shell Tube Heat Exchanges, Waste Heat Boiler, Reactors, Stack, Sump Drum, Sulphur Condenser with Refractory lining, Adsorber Vessels, Driers, Air Coolers, Burners, Tube bundles, Filters, Skids, Pressure Safety Valves (PSV), Unfired Furnace, Flanges and Fittings, Fasteners, Steel Structure (ladder, platform, Piping supports etc...), Incoming Raw Materials & Insulation etc.

INSPECTION OF PROCESS PIPING AND PIPELINES:

During Shutdown various Above ground Process Piping Inspection as visual inspection on external condition for piping (Leaks, misalignment, vibration, supports, corrosion, insulation etc...), Valves, flanges, supports, steel structure attachments etc..., weld visual, witness and review of NDT and Advance Inspection Techniques (UT, MT, PT, RT, IRIS etc...), UT thickness, cut out piping, witness hydro test, visual of CUI, identification of damages mechanism, witness of repair of welding and painting, clearance for box-up, reports and documents review etc...

INSPECTION OF STORAGE TANKS:

During Shutdown various Storage tanks(Condensate Tank, Demineralised water tank, Degassed water storage tank, SWS feed tank, Cooling medium expansion tank etc...), External and internal visual inspection, visual of internal as opened and detailed condition for the bottom and annular plate, shell, foundation, roofs, man way nozzles, tank piping manifold and steel structures etc..., witness and review of various NDT(UT survey and UT thickness, PAUT, MPI,PT etc...), Magnetic Flux Leakage(MFL) report review and patch plate location and size confirmation as per API 653,remaining life calculation, Roundness and plum check, weld visual, identification of damages mechanism ,Witness of patch plate welding and repair base metal scab welding, witness of repair for Painting, clearance for box-up, reports review etc...

QA/QC INSPECTION SPECIALIST RESOURCE SERVICES:

TASK Inspection & Industrial Services Private Limited provide the well qualified below inspectors as per client requirements to India and worldwide.

- API Inspectors/ Integrity Engineers
 - API 510 – Pressure Vessel Inspectors
 - API 570-Piping Inspectors
 - API 653- Aboveground Storage Tank Inspectors
 - API 580-Risk Based Inspection (RBI) Inspectors
 - API 571-Materials and Corrosion Inspectors
 - API 936- Refractory Inspectors
- Inspection Engineers/QA QC Inspectors (Mechanical, Electrical, Civil, Instrumentation, HSE etc...)
- Expediting Engineers
- Welding Inspectors-3.1 & 3.2.2 (AWS, CSWIP)
- Coating/Painting Inspectors- (NACE Level-2, BGAS Grade-1)
- Insulation Inspectors
- Conventional NDT Inspectors & Technicians (ASNT /PCN) (RT, RTFI, UT, UTT, MPI, PT, VT, HT&PMI)
- Advanced NDT Inspectors and Technicians (ASNT /PCN) (MFL, PAUT, TOFD, LR UT, IRIS, ECT, Boroscope)
- Heat Treatment (PWHT) Technicians

TECHNICAL CONCLTANCY:

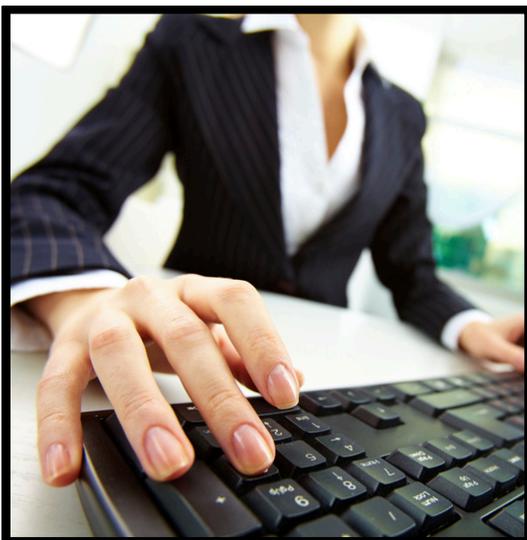

TASK Inspection & Industrial Services Private Limited provide the technical consultancy for below categories to client and candidates in globally.

- Certification Renewals (NDT, CSWIP, BGAS, API etc...)
- Course Trainings (NDT, CSWIP, BGAS, API etc...)
- ISO-QMS Certifications
- WPS/PQR/WPQ – Supporting Services
