2. SECOND PARTY INSPECTION

It is expected that the material and items you have received from sub-vendors/partner companies do not meet your expectations and would cause a delay in production. Many suggest getting ISO 10204 3.2 certified items/materials to avoid this, but assigning an inspector to attend the tests is too expensive and time-consuming. With our well-distributed network of professional inspectors, you have the possibility to perform the inspections on your request with a reasonable price.

If you need additional personnel to carry out system monitoring as second party inspection under your umbrella and following your instructions by your vendors and subcontractors,

TASK can work as a part of your team on a needs-based basis, offering the flexibility to respond to unexpected spikes in demand or other unusual circumstances. Whether for a one-off project or ongoing project, our engineers can work with you on-site to provide accurate and reliable results wherever and whenever you need us. Most of our expert testing and inspection teams have decades of documented experience in various industries and sectors, including the petrochemical, chemical, oil & gas industries, power plants etc...

3. EXPEDITING SERVICES

Expediting is a concept in purchasing and project management for securing the quality and timely delivery of goods and components. **TASK Inspection & Industrial Services** provides the qualified & analytics expeditors to India and various countries for completed project successfully within the time frame. The procurement department or an external expeditor controls the progress of manufacturing at the supplier concerning quality, packing, conformity with standards and set timelines. Thus, the expeditor makes sure that the required goods arrive at the appointed date in the agreed quality at the agreed location.

- Supplier/Vendor Procurement Status
- Assessment of Production Schedules
- Monitoring Supplier/Vendor Schedules for Submittal of Documentation
- Verification of Delivery/Completion Schedules
- Manpower Loading and Assessment
- Verification of Production Schedule
- Verification of Equipment Capabilities
- Auditing Supplier/Vendor manufacturing Processes
- Engineering Information Verification
- Reporting Daily/Weekly/Monthly basis

4. SUPPLIER AUDIT SERVICES

We provide System Audits (Quality, Environment, Health and Safety), Product Audits and System Audits at Supplier Premises as per international standard and client requirement.

5. SHUTDOWN / TURNAROUND / IN-SERVICE INSPECTION / RISK BASED INSPECTION / FITNESS FOR SERVICES

We specialize in carrying out Shutdown/ turnaround projects and technical staffing services for various Oil and Gas industries based across the India and worldwide.
